

**Step One:** Log-in to your **Shopify Admin Panel**. This should look something like this:

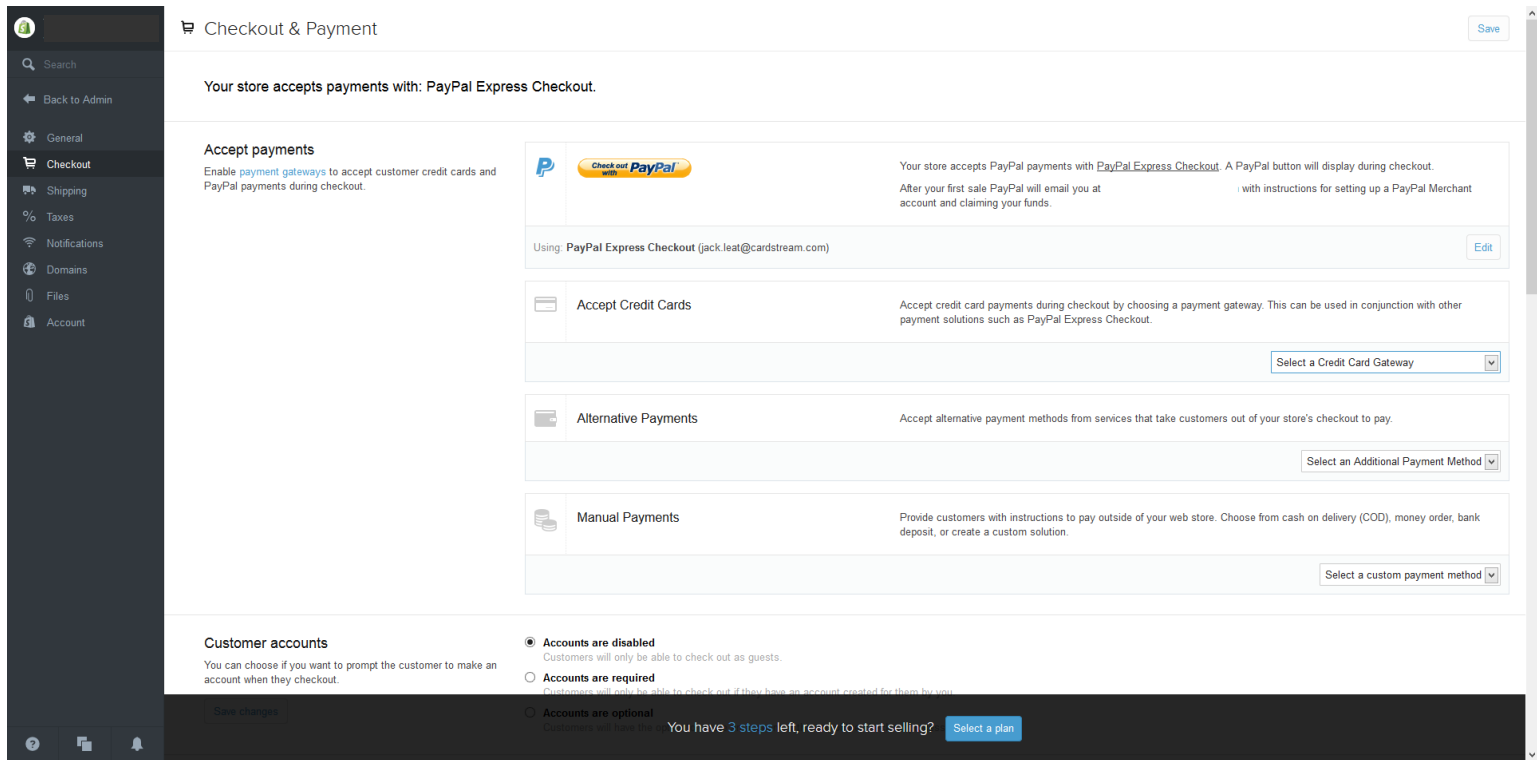

On the left hand panel click **'Settings'**

**Step Two:** Once in **'Settings'** click on **'Checkout'**, this will take you to the correct place to set up your Cardstream account.

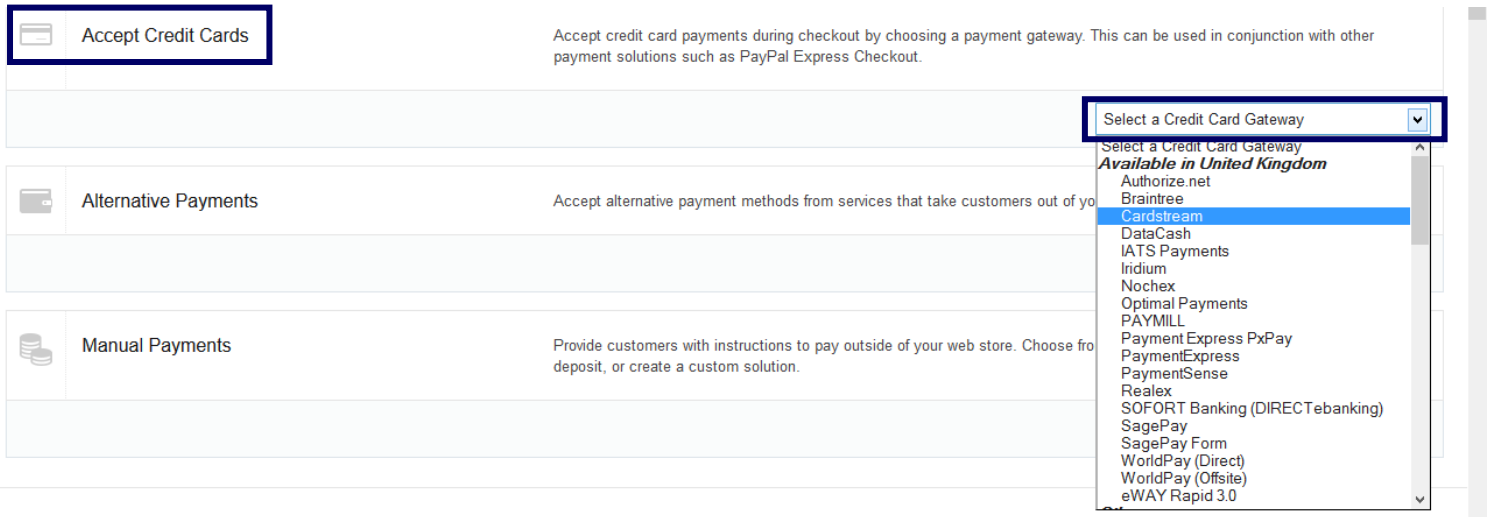

Once you've clicked on 'Checkout' this page will appear:

The screenshot shows the 'Checkout & Payment' settings page in Shopify. The page title is 'Checkout & Payment' and it includes a 'Save' button in the top right. The main heading is 'Your store accepts payments with: PayPal Express Checkout.' Below this, there are three sections for accepting payments: 'Accept payments', 'Accept Credit Cards', 'Alternative Payments', and 'Manual Payments'. The 'Accept Credit Cards' section has a drop-down menu labeled 'Select a Credit Card Gateway'. At the bottom, there are radio button options for 'Accounts are disabled', 'Accounts are required', and 'Accounts are optional'. A blue button labeled 'Select a plan' is visible at the bottom right.

**Step Three:** In the section 'Accept Credit Cards' there is a drop-down box. From the list please choose 'Cardstream'.

This image is a close-up of the 'Accept Credit Cards' section from the screenshot above. The 'Accept Credit Cards' heading is highlighted with a blue box. The drop-down menu 'Select a Credit Card Gateway' is also highlighted with a blue box and is open, showing a list of payment gateways. The 'Cardstream' option is highlighted in blue within the list. Other options include Authorize.net, Braintree, DataCash, IATS Payments, Iridium, Nochex, Optimal Payments, PAYMILL, Payment Express PxPay, PaymentExpress, PaymentSense, Realex, SOFORT Banking (DIRECTeBanking), SagePay, SagePay Form, WorldPay (Direct), WorldPay (Offsite), and eWAY Rapid 3.0.

**Step Four:** Once 'Cardstream' has been chosen, the following box will appear for you to fill in with your Cardstream details:

Cardstream

Accept credit card payments during checkout by choosing a payment gateway. This can be used in conjunction with other payment solutions such as PayPal Express Checkout.

Cardstream

**Credit card rate**  
Set by Cardstream

**Transaction fee**  
Up to 2.0% — [pick a plan](#)

Test Mode allows you to test the functionality of your payment gateway without any money changing hands. Transaction fees are not charged by Shopify on transactions completed in test mode. You may have to use different credentials for test mode depending on your gateway provider.

Use test mode ⓘ

Please provide your Cardstream credentials:

**Cardstream ID**

**Signature Key**

Cards To Accept During Checkout:

Activate

Your **Merchant ID** is the 6 digit ID code that Cardstream sent out to you when your Account went live. This ID is normally along the lines of 100--- or 101---

The '**Signature Key**' is a unique special password which **YOU** create. When creating this we recommend:

- It is at least eight characters long;
- Does not contain your user name, real name, pet names, or company name;
- Does not contain a complete word;
- It is significantly different from previous passwords;
- Different from you Merchant Management System (MMS) log-in password.

The 'Signature Key' which you would've just created, also has to go into the Merchant Management System (MMS). Please follow the next few steps to find out how to place this into the MMS:

1. Log into your MMS account
2. Click on the Preferences tab *(make sure you are viewing the correct Merchant Account, if you have more than one)*
3. Find the Signature Key section
4. Place the identical 'Signature Key' from your Shopify account configuration, into the text box in the Signature Key section and then save all changes.

## [MMS > Preferences > Signature Key](#)

### Signature Key

For additional security, you must enter a signature key below. This must match the signing request of your integration or your e-commerce software.

Signature:  required

Update Signature

**Step Five:** Once the ID and Signature Key have correctly been entered within Shopify and the MMS, please choose the cards you would like to accept.

 **Cardstream** Accept credit card payments during checkout by choosing a payment gateway. This can be used in conjunction with other payment solutions such as PayPal Express Checkout.
